

For Sure

# Introduction dvLED Connect-it

# dvLED market

- Mainly 2 different sizes dvLED cabinets
  - 27" cabinets
  - 500x500 / 500x1000 cabinets
- 27" cabinets
  - Used to create 16:9 configurations (full HD, 4K, 8K)
  - Applications: meeting rooms (corporate), some control rooms
- 500x500 / 500x1000 cabinets
  - Used to create any specific size (no 16:9 configurations)
  - Retail, (rental)

## Integrator Insight(s)

Integrators need a solution for their specific dvLED video wall project. Not necessarily a universal solution.

The Vogel's dvLED Connect-it line up is a a universal solution for (almost) all dvLED brands. We also offer ready to order, pre-defined kits for the most common brands, series and configurations.

# dvLED Connect-it kits

- Dedicated brand/series kits on our website for 16:9 configurations (Full HD, 4K and 8K)
- Bill of materials is similar for 4x4 / 5x5 / 6x6 / 8x8 kits. The datasheet/drawings on the website is different!
- On requests (new) brands and (new) series can/will be added
- No kits for 500x500 cabinets. Used in retail mostly and not used to create a 16:9 video wall.

## Absen dvLED video wall

Easy to install dvLED mounting solutions

Suitable for:

## Key differentiators/features

Important requirements for a dvLED mounting solution

- Ease of installation
- Adjustability in x, y and z direction
- Depth of the solution
- Modular
- Universal

## Commercial claim

The Vogel's dvLED Connect-it system is an easy to install modular, universal dvLED video wall mounting solution with a slim design and seamless installation thanks to the various fine-tune adjustment possibilities.

# Reasons to believe

- Ease of installation
  - Various adjustment possibilities
  - No cutting on site required
- Universal
  - Fits (almost) all brands
  - For floor, wall and ceiling installations
- Slim design. Total depth is only 40,5mm (excluding cabinets)
- Adjustable in x, y and z direction
- TUV 5, UL
- Vogel's video wall engineering service
  - Installation drawings | Free of charge, within 24 hours
  - On site installation support

## Product overview

- New dvLED interface bar
- X,y,z adjustable wall bracket
- Coupler and extension part, modular.
- Universal mounting bolts
- Adjustable feet for wall solutions.
- Universal re-usable spacer.

# dvLED Interfacebar and mounting bolts: PLB 31xx and PLA 9305

Dedicated dvLED interface bar.

Available in 4 lengths to create any configuration  
PLB 3111 – 1,1m  
PLB 3120 – 2,0m  
PLB 3127 – 2,7m  
PLB 3133 – 3,3m

Universal mounting bolts (M6, M8 and M10) for any brand/series.  
(4pcs in a set)

Locking part included.

dvLED cabinets will be mounted directly into the dvLED interface bar

## X,y,z adjustable wall bracket: PLA 9302

Slim design: Depth included dvLED interface bar is only 40,5 mm.

Depth adjustment up to 40 mm. Necessary for uneven walls. Ideal for recessed installation!

Fine tune adjustment in y (vertical) direction Up to 10mm!

Adjustable in x (horizontal) over de dvLED interface bar. Suitable to mount on stud walls.

# Coupler and extension part: PLA 9303 and PLA 9304

PLA 9303

Extension part is adjustable from 250mm up to 450mm.

Cutting on site is not required

Modular, every required length can be created

Coupler can also be extended up to 200mm to create any required width

PLA 9304

# Universal spacer: PLA 9306

Spacer to determine the height between two dvLED interface bars.

Universal: Can be used for all dvLED brands and series up to panels of 1m.

PLA 9306

Re-usable for every installation.

Set the spacer by using a measuring tape.

# Adjustable feet for wall solution: PLA 9307

Brackets will never be visible below the video wall

Adjustable up to 40mm (same as PLA 9302 wall bracket)

Used only for the bottom mounting holes of the bottom row in a wall solution

Cost effective solution for the bottom row of cabinets

PLA 9307

# Mounting on PUC 29xx: PLA 9301, introduction summer 2024

A nut channel strip that stays on height in the nut channel

Brackets that click on the extrusion bar (without using bolts and nuts)

Save assembly time in our warehouse and installation time on the job

Temporary solution: 999974: PFA 9126 + 2 T-bolts and nuts

# dvLED Connect-it wall mounted

# dvLED video wall mounted on PUC 29xx sytem

# USP's

## USP 1

Ease of installation!  
No cutting on site

## USP 2

Mounting depth:  
only 40,5mm  
(excluding cabinets)

## USP 3

Depth adjustment of  
40mm. For uneven  
walls and recessed  
installations

## USP 4

Fine tune height  
adjustment of 10mm.  
Perfect to make sure  
the dvLED interface  
bar is installed  
perfectly levelled

# Vogel's video wall engineering service

- We supply CAD drawings and installation drawings for each project within 24 hours.  
Usually, these drawings are made by integrators themselves.
- New dvLED Connect-it will be ready from the first of March.
- Everyone has their own log-in and password.  
(Contact R&D if you need support to download/install driveworks)

## STEP 4: Components Summary & Calculations

### Required Components

Type	Description	Amount	
PFF 7965	Adjustable floor plate	3	
PUC 2920	Construction profile 2000 mm	3	
PUC 2933	Construction profile 3300 mm	3	
PFA 9156	PUC 29xx profile Coupler	3	
PFA 9132	Floor/ceiling support	3	
PLB 3111	LED bar 1100mm	6	
PLB 3133	LED bar 3300mm	6	
PLA 9301	Connection bracket kit for LED profiles	18	
PLA 9303	Profile extender kit	6	
PLA 9304	U-profile LED bar coupler	6	
PLA 9305	Mounting kit LED	12	

Combined weight of displays  kg

### Required (cut off) lengths

Length in mm	Cutoff Length in mm	
(3x) 2384	(3x) 384	
(3x) 2916		
(6x) 1100		
(6x) 3300		

### Configuration options:

- PUC 2920 \* Will be allowed in configuration if necessary \*
- PUC 2927 \* Will be allowed in configuration if necessary \*
- PUC 2933 \* Will be allowed in configuration if necessary \*
  
- Check to supply a LED spacer
- Select bar mounting option: PLA9301 will be used
- Select cutting option: \* Cutting is not allowed, profile extender PLA 9303 will be supplied if necessary\*
