

RISE SERIES

Motorized
display lifts

Introduction

Vogel's RISE: a product line of motorized display lifts

Vogel's presents its product line of motorized display lifts: RISE. The product line is specially designed for use in educational and business environments.

RISE offers professional AV installers and IT companies a range of stylish, safe and user-friendly electrically operated solutions for installing large displays and interactive screens.

Vogel's has a long track record of providing professional solutions.

Safety and convenience are paramount when installing AV equipment in educational settings. You want digital screens, whiteboards, touchscreens and projectors to be easy for everyone to use.

Every office and business space calls for tailor-made solutions for AV systems. Some meeting rooms require flexibility, with a display on a mobile trolley. And a reception area in a large company often features a video wall as an eye-catcher.

RISE to the occasion

Vogel's motorized display lifts

A series of motorized display lifts that allow you to intuitively and safely position a display in the right place and at the right height. Always safe thanks to the durable and stylish design, which meets the highest international safety standards. A top-down installation guarantees easy and quick assembly.

Vogel's. For Sure.

- ✓ Motorized movement at 50 or 80 mm per second with the QuickRise™ system.
- ✓ Anti collision. In case of obstruction the lift moves back in opposite direction.
- ✓ Very user-friendly. You can intuitively raise the display to the desired height with the push of a button.
- ✓ Can be expanded with various accessories.

Available as a trolley and floor-wall solution

The **RISE 2000** fixed wall system offers maximum safety, particularly in educational spaces. The screen is mounted close to the wall and rests on the floor. All cables are fully concealed.

The trolley versions offer maximum flexibility. These mobile solutions can be easily moved to any location within a building.

The **RISE 3000** is suitable for budget-conscious customers and is built with limited accessory options and first-class safety standards

The **RISE 4000** is ideal for flexible and dynamic environments and features flexible and secure motorized display trolleys that can be combined with RISE accessories, including whiteboards up to 86 inches.

When only the best will do, the **RISE 5000** offers everything in terms of intuitive use, safety and design. The award-winning aluminium frame offers a stable and safe motorised display lift for the screen.

RISE: the safe, intuitive, motorized display lift for use in education

Vogel's display lifts are compact, safe, durable and very user-friendly. This makes them ideally suited for use in educational settings, where large digiboards or touchscreens are used daily during lessons and lectures.

User-friendly for teacher, pupil and student

The intuitive operation of the lift system means that anyone, big or small, can work with it effortlessly. With a simple push of a button, you can safely raise the display to the desired height.

Secure solution for large, interactive displays

RISE also rises to the occasion in terms of safety. With a focus on use in education, children's safety has been taken into consideration in the design. The base is specially designed to prevent tripping. And thanks to the cable management system, cables are neatly and safely concealed.

Anti collision

During the upward and downward lifting movement, the display and system are protected against damage. If the display accidentally comes into contact with a chair or other object, the display lift automatically moves back in the opposite direction thanks to the Anti Collision mechanism.

Always a tailor-made solution

RISE motorized display lifts are available in different versions. The fixed wall system offers maximum safety in educational environments. The display is mounted on the floor and close to the wall, and all cables are fully concealed. The trolley version offers maximum flexibility. This mobile solution can easily be moved to any location within a building.

All RISE motorized display lifts can be expanded with a whiteboard set (65, 75 or 86 inches). Other accessories, such as a laptop support or hidden storage unit, complete the set-up.

Safety first

At Vogel's, safety comes first. RISE motorized display lifts therefore meet the highest international safety standards. With TÜV, CE, UL and GS, they have all certifications, which is unique in the market. A display cannot be mounted more securely.

The display lifts are equipped with Anti Collision, a finely tuned safety mechanism that prevents the display and system from being damaged when moving up or down. If obstructed, the display moves back in the opposite direction.

The design also considers the safety of the user. The base is specially designed to prevent tripping. And all corners are rounded, making maintenance and cleaning easier and safer.

For corporate use

In a modern office or meeting environment, you don't want a bulky installation for your screens; you want a slim, compact solution. With RISE motorized display lifts, you opt for design, innovation and ease of use.

The timeless design with rounded corners, the cables neatly concealed in a cable duct, the high-quality materials and the attractive finish ensure that RISE display lifts blend

seamlessly into any corporate environment.

Thanks to the intuitive operation of the lift system, you can effortlessly move the display to the ideal height. With QuickRise™ you can raise and lower a display electrically at a speed of 50 or 80 mm per second.

Easy to install

Top-down installation makes mounting the RISE motorized display lifts very easy. The compact column is supplied complete. You only need to mount the lift on the trolley or the floor stand. The floor-wall solution can be installed safely and quickly with just four bolts. Vogel's ClickLoc™ (EU patent pending) allows you to attach the display to the frame with a single solid click.

Product details

CIS®

The Cable Inlay System ensures that cables are neatly and safely concealed

Interface strips

For displays of up to 98 inches and weighing up to 140 kg (Floor-Wall) | 120kg (Trolley and Floor stand)

Release straps

For easy release of the display

Safe base construction

(trolley) Reduced risk of tripping

swivel castors

(trolley version)

Thanks to the sturdy swivel castors, the lift can be moved easily over any surface.

Accessories

Expandable with whiteboard set (65, 75 or 86 inch) and other accessories

Clickloc™

Mount the display to the frame with one solid click

Height adjustable up to 700 or 980 mm

Anti Collision safety mechanism

On contact with an object, the display lift moves in the opposite direction

QuickRise™

Display electrically lifted or lowered at a speed of 50 or 80 mm per second

TÜV tested at 5x maximum weight capacity.
CE, UL and GS certified

Why opt for a RISE motorized display lift?

- 1.** RISE motorized display lifts are quick and easy to install thanks to convenient top-down assembly.
- 2.** RISE motorized display lifts are TÜV, CE, UL, ADA compliant and GS certified and therefore comply with all international safety standards. A special Anti Collision safety mechanism protects the display and system by automatically moving in the opposite direction in the event of an obstruction.
- 3.** Only durable, high-quality materials are used for RISE display lifts, ensuring a long service life. In addition, the products are packaged in the most environmentally friendly way possible, so that the carbon footprint and waste streams are kept to a minimum.

- 4.** Thanks to their timeless design, RISE display lifts blend in beautifully in any room.
- 5.** Operation is incredibly simple. You can intuitively raise the display to the desired height with the push of a button. A wide stroke length provides options for a very low or high position, suitable for users of all ages and heights.

Accessories, fit RISE Series

By adding extra accessories, you can easily turn a motorized display lift into a complete solution. All RISE motorized display lifts can be expanded with accessories such as custom-made whiteboard sets (65, 75 or 86 inches), a laptop shelf, a videoconferencing camera shelf, a sound bar mount or a hidden storage unit.

Why Vogel's?

The best solution

In our Product Development Centre, we develop products that fully meet the wishes of the end user and those of the installer. This is the starting point of any new product development process at Vogel's. What do we add to that? Future-proof design. So that, even after many years of intensive use, the end user is as happy as ever with it.

The best materials

At Vogel's, we don't compromise on quality. You have to be confident that you have bought a very strong, solid and sustainable product. For us, quality is key in every step of the design process.

Maximum safety

Vogel's products are almost always TÜV-certified. An independent guarantee that you have an absolutely safe product. We test many products for the professional market at five times the maximum weight capacity.

Quick and easy installation

Every Vogel's product is designed for easy mounting. As an installer, this saves you a lot of time, especially on large projects.

Service and support

As easy as our solutions are to install, sometimes extra support is needed. In corporate environments, you also encounter complex and large installation challenges. Our engineers and product designers have a great deal of experience and are happy to offer you expert advice.

Leading for 50 years

As an AV installer, you can rely on Vogel's. For 50 years, Vogel's has been developing innovative, reliable and user-friendly mounting solutions for both the consumer and professional markets. Solutions that excel in design, safety and ease of installation. So you never choose just any mounting solution. You choose the certainty of the best solution.

Vogel's. For Sure.
