MODULAR LCD/PLASMA

TURN & TILT UNIT BACK-TO-BACK

PFA 9002

The PFA 9002 turn & tilt unit back-to-back can be used to mount 2 LCD/Plasma TV's to the wall, ceiling or floor (in combination with other modular parts).

The PFA 9002 turn & tilt unit back-to-back is part of a modular system which enables you to create your own ceiling or floor mounting solution for LCD/Plasma TV's up to 60 kg.

The Autolock® locking system locks the interface onto the support and prevents the display from falling of the turn&tilt unit when accidentally lifted. The optional lock PFA 9008 blocks the locking system, hence preventing theft.

The tilt indicator makes it easy to set up multiple displays at the same angle, for example at train stations or in shopping malls (max. 20° tilt).

For ceiling mounting just add the needed ceiling mounting plate, extension tube and 2 universal LCD/Plasma interfaces (FAU 3150/3125). In case of floor mounting add floor stand PFA9011 and the needed 2 universal LCD/Plasma interfaces (FAU 3150/3125).

- Autolock® locking system
- Fits on PFA extension tubes and standard 60 mm tube

- Suitable for interfaces FAU 3125 or FAU 3150
- Turn & 20° tilt function

 **MAX. 60 kg 133 lbs**
